

- Store your favorite rosin in the Rosin Saver and remember to snugly close the lid when not in use to maintain the freshness of your rosin and the humidity pack.
- With normal use the humidity pack can last for over a year. Crystals will slowly form within the pack as it dries out, but the pack remains effective until it is completely hard.
- While Rosin Saver can help rejuvenate stale rosin, for best results start with fresh rosin.

## HOW TO USE

Remove one double-sided adhesive pad and one humidity pack from bag.

Tightly reseal bag to preserve freshness of replacement pack.

Remove backing from one side of pad and affix pad to center of humidity pack.

3

Remove other sticker backing from pad.

Tightly fold corners of pack towards the center and stick them down.

Flip it and stick it. Firmly press pack to the bottom of the jar.

4

Drop in your favorite rosin and secure the lid.

5

Periodically check for hardening of the pack with your finger.

Once the pack is completely hard, pop it out and install a fresh pack.

### ***Optional Silicone Cup:***

Remove any packaging from rosin (e.g. paper, cloth) before inserting. Soft rosins will take on the shape of the cup. Roll down sides of cup to use.
